RYAN MARTIN HIDAYAT

Senior Full-Stack Engineer | Golang | Laravel | AWS | Cybersecurity

Jakarta, Indonesia | +62 811 905 3003 | ryan.martin3003@gmail.com
linkedin.com/in/ryanhid | github.com/ryanma3003

PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with 10 years of IT experience, including 8 years designing, building, and modernizing enterprise web applications across software engineering, cloud infrastructure, and cybersecurity. Expert in Golang, PHP/Laravel, JavaScript/TypeScript, Python, and SQL, with hands-on AWS (EC2, S3, Lambda), Docker, Linux, and CI/CD (GitHub Actions) delivery. Track record of launching SaaS platforms from zero to production, cutting server CPU load by 70% through serverless architecture, and hardening government systems with Zero Trust access. Combines engineering depth with security expertise to deliver scalable, secure, high-availability systems.

CORE COMPETENCIES

Full-Stack Development | Microservices | RESTful API Design | System Design | Cloud Architecture | Serverless | Cloud Migration | CI/CD | DevSecOps | Zero Trust Architecture | Cybersecurity Maturity Assessment | Gap Analysis | Incident Response (CIRT/CSIRT) | Performance Optimization | Scalability | Payment Gateway Integration | Stakeholder Management | Technical Leadership

TECHNICAL SKILLS

Languages: Golang, PHP, JavaScript, TypeScript, Python, SQL, HTML, CSS
Frameworks: Laravel, Lumen, React, Vue.js, Svelte, Flask, Rasa
Databases & Messaging: PostgreSQL, MySQL, Redis, RabbitMQ
Cloud & DevOps: AWS (EC2, S3, Lambda), Serverless, Docker, Linux, GitHub Actions, CI/CD
Security: Zero Trust Architecture, Secure Tunneling (Tailscale), Cybersecurity Maturity Assessment, Gap Analysis, CIRT/CSIRT Establishment
AI & Data: LLM Response Evaluation, RLHF, Data Labeling, Annotation, Image and Search Analysis

PROFESSIONAL EXPERIENCE

Cyber Security Analyst | 2022 – Present
National Cyber and Crypto Agency (BSSN) | Jakarta, Indonesia

- Led the establishment of Computer Security Incident Response Teams (CSIRT) for stakeholder organizations, defining incident response procedures, roles, and escalation workflows.
- Conducted cybersecurity maturity assessments for stakeholder organizations, delivering gap analyses, risk-prioritized remediation roadmaps, and executive-level reports.
- Architected and launched a secure web platform that digitized the end-to-end assessment process, eliminating manual workflows and accelerating assessment turnaround.
- Engineered a Zero Trust architecture using secure tunneling (Tailscale), closing 100% of inbound ports and shrinking the external attack surface while maintaining uninterrupted access for authorized users.
- Boosted platform scalability and reduced response times by implementing concurrent processing (Golang goroutines) to handle high-volume request loads.

AI Training Data Annotator (Freelance) | 2025

- Evaluated, rated, and ranked large language model (LLM) responses for factual accuracy, safety, tone, and helpfulness, producing high-quality training data for model alignment (RLHF).

Full-Stack Engineer | 2019 – 2022
PT Visi Tujuan Bersama | Jakarta, Indonesia

- Architected and built the company's core SaaS platform from scratch (Laravel, MySQL), taking it from concept to production for B2B and B2C clients.
- Designed and shipped KPI tracking, talent profiling, and 360-degree performance evaluation modules, expanding the product's revenue-generating feature set.

- Integrated payment gateway workflows to automate revenue tracking and commission distribution, eliminating manual reconciliation.
- Implemented CI/CD pipelines (GitHub Actions), increasing deployment frequency and reducing release failures and manual deployment effort.
- Reduced server CPU utilization from 99% to 30% by offloading resource-intensive PDF generation to serverless functions (AWS Lambda).
- Led cloud migration from VPS to AWS (EC2, S3, Lambda), improving elasticity, scalability, and system availability.

Full-Stack Engineer | 2018 – 2019
PT Bank DKI | Jakarta, Indonesia

- Maintained and extended the bank's internal HRIS (PHP, MySQL), delivering new features and resolving production defects.
- Built a centralized employee forum module that shifted 85% of HR information delivery onto the HRIS, streamlining internal communication.
- Refactored KPI services to eliminate downtime during peak submission periods, ensuring reliable performance under high concurrent load.

IT Technical Support | 2017 – 2018
PT Kinarya Alihdaya Mandiri | Jakarta, Indonesia

- Resolved hardware and software incidents for end users, maintaining operational continuity and meeting service-level targets.
- Configured systems, troubleshot technical issues, and managed IT asset maintenance across the organization.

IT Technical Support | 2016 – 2017
PT Mitra Integrasi Informatika | Jakarta, Indonesia

- Delivered frontline IT support, diagnosing and resolving user issues to sustain internal IT operations.
- Configured systems and troubleshot infrastructure issues in support of the internal IT team.

SELECTED PROJECTS

Stakeholder Management Platform | 2026

- Architected an enterprise platform unifying cybersecurity assessments, automated risk surveys, executive dashboards, a learning management system (LMS), event RSVP, and micro-blogging.
- Implemented event-driven messaging with RabbitMQ and caching with Redis for scalable, responsive performance.

Tech: Golang, Vue.js, PostgreSQL, Redis, RabbitMQ, Docker

Zi.Care HRIS | 2023

- Built an end-to-end HR digitalization platform covering attendance, KPI tracking, 360-degree reviews, leave management, payroll processing, tax calculation, and turnover analytics dashboards.

Tech: Golang, Vue.js, PostgreSQL, Redis, Docker

DJKI AI Chatbot and Live Agent | 2023

- Developed an AI chatbot that automates responses to frequently asked user questions and seamlessly escalates complex cases to live agents.

Tech: Python, Flask, Rasa, SQL

Daulat Umat Landing Page and Zakat Payment | 2021

- Developed charity campaign landing pages and payment web services that process donation, zakat, and fitrah transactions.

Tech: Lumen, Svelte, SQL

Subrosa Landing Page and Reservation System | 2021

- Built a restaurant website with online table reservations and integrated payment processing, deployed on AWS.

Tech: Laravel, SQL, HTML, CSS, AWS

EPMS – Bank DKI | 2019

- Developed an employee performance management system for tracking employee KPIs and appraisals.

Tech: PHP, SQL, HTML, CSS

Berkat Panduan Hikam Company Profile Website | 2017

- Built and launched a responsive company profile website.

Tech: Laravel, SQL, HTML, CSS

EDUCATION

Bachelor of Information Systems | 2011 – 2016

Universitas Islam Negeri (UIN) Syarif Hidayatullah Jakarta

CERTIFICATIONS

- Google Cybersecurity Specialization – Google
- Database Administration Fundamentals – Microsoft
